SECTIONAL GARAGE DOOR

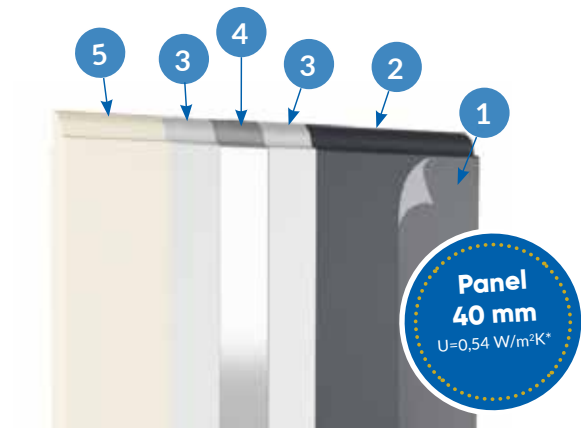

Comfort, safety and optimal thermal performance

The clever design of the door, based on a system of robust panels in the tracks, guarantees optimum clearance and effective protection of the garage against cold and environmental influences.

1. Polyester coating | 2. Primer coating | 3. Galvanised steel Z225 | 4. Polyurethane foam | 5. Galvanised steel Z100 | 6. Primer coating | 7. Polyester coating

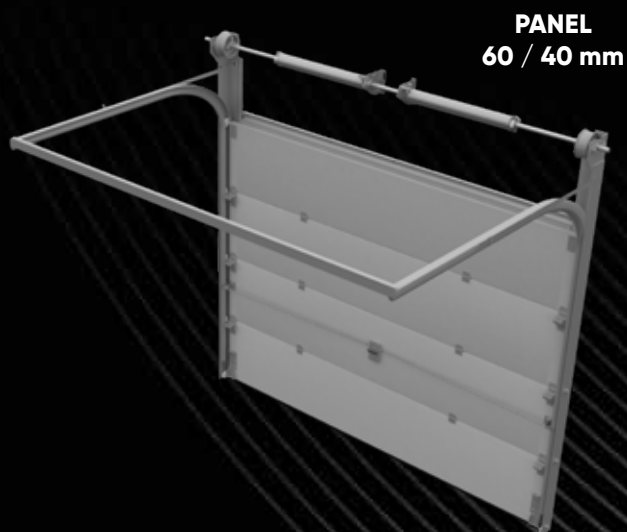

1. Protective foil | 2. Organic coating Galfan | 4. Steel | 5. Polyurethane foam

PANEL TYPES

Sectional garage doors are available in three panel designs: smooth, highly embossed or embossed. A wide range of painting and veneering options allows for unique, modern combinations.

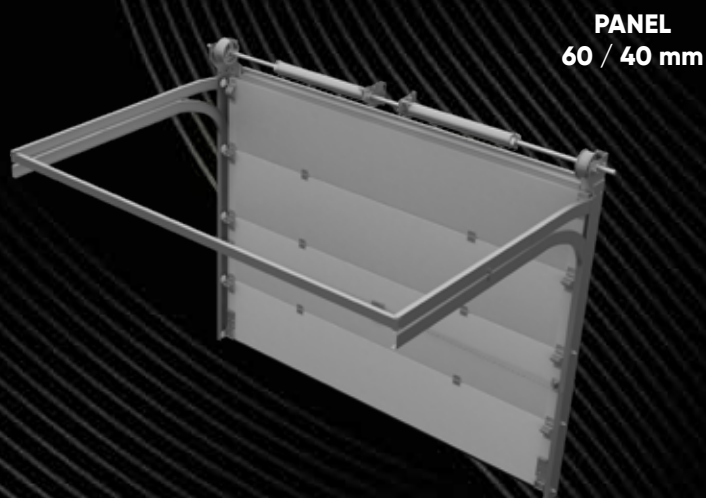

TYPES OF TRACK SYSTEMS

PANEL
60 / 40 mm

ST track system

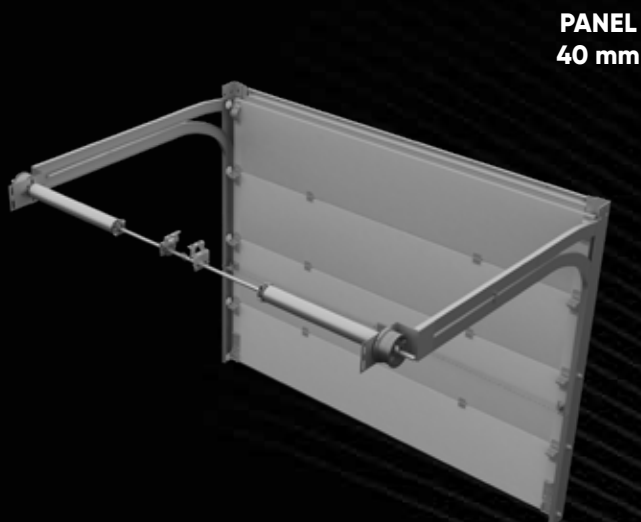

- » lintel ≥ 350 mm for 40 mm panel
- » lintel ≥ 370 mm for 60 mm panel
- » front-mounted springs
- » single horizontal tracks
- » minimum width of lintels: 110 mm

PANEL
60 / 40 mm

LHF track system

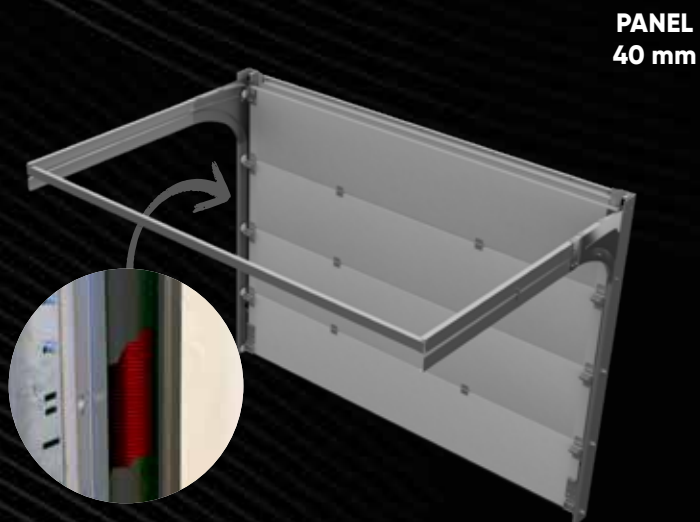

- » lintel ≥ 350 mm for 40 mm panel
- » lintel ≥ 370 mm for 60 mm panel
- » front-mounted springs
- » single horizontal tracks
- » minimum width of lintels: 110 mm

PANEL
40 mm

LHR track system

- » lintel ≥ 100 mm (manual door)
- » lintel ≥ 150 mm (automatic door)
- » low lintel - springs fixed at the back, double horizontal tracks
- » minimum reveal width: 160 mm

PANEL
40 mm

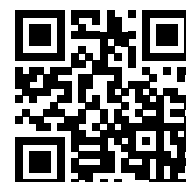

N track system

- » lintel ≥ 100 mm (manual door)

» LiftMaster LM3800W

REMOTE CONTROLS

» Somfy Remote Control

» Universal Remote Control

» LiftMaster Remote Control

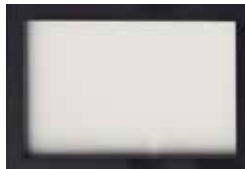

CUSTOMIZE THE LOOK OF YOUR GARAGE DOOR TO YOUR NEEDS

Decors and glazings

DECORATIVE ELEMENTS

Elements of various geometric shapes are glued onto the panels from the outside, made of lightweight material that is resistant to damage.

GLAZING IN STAINLESS STEEL FRAME

Solid polycarbonate in a plastic frame, fitted in the panels. Available in white, brown, black, golden oak, walnut, mahogany, and anthracite grey.

GLAZING IN STAINLESS STEEL FRAME

Solid polycarbonate in a stainless steel frame, fitted in the panels.

ALUMINIUM GLAZED PANEL

Panel filled with solid, double-glazed polycarbonate. Installed in place of the panel to let natural light into the garage.

ALUMINIUM PERFORATED PANEL

A perforated steel panel, designed to replace a standard garage door panel, offering enhanced ventilation and natural light for the interior.

GARAGE SIDE DOOR

Side doors are a practical solution for quick and effortless access to the garage interior. These functional doors are successful in residential, industrial or commercial buildings.

- » ALU profile 65 mm wide
- » thermal break
- » 3 chambers in the frame
- » panel height 500 mm or 610 mm

SERVICE DOOR

The service door is the perfect addition to the functionality of your garage door. The solution allows you to conveniently access your garage without having to lift the door blade.

» low threshold 30mm

» protection against crushed fingers

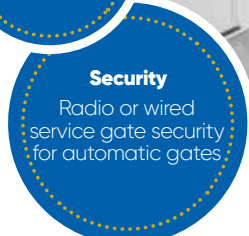

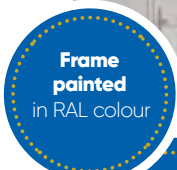

» handle with a lock

» door closer

» 5-point espagnolette

ROLLER GARAGE DOOR

Space-saving, ergonomic and maximum thermal insulation

A dedicated solution for smaller garage spaces and anywhere where space matters. Thanks to the vertical track system and the absence of ceiling guides, no additional space is needed to install the door.

- » durable aluminium armoured
- » double-walled lamellas, filled with polyurethane foam
- » pipe motor

Photocells (optional)

Key switch

Crank for emergency opening

Rollixo control (optional)

Armour types

STANDARD ARMOUR

- » profile with double walls, filled with polyurethane foam
- » increased resistance to atmospheric factors
- » optimum comfort and safety in use

ARMOUR with rectangular glazings

- » armour with rectangular polycarbonate glazing
- » better garage natural daylight
- » excellent thermal insulation and high weather resistance

NOTE!

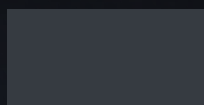

We also offer renovation profiles, available in two sizes, depending on the type of installation.
